(54) PACKAGING FILM FOR FOOD

(57)Abstract:

PURPOSE: To obtain a packaging film for food which is excellent in preservability of food, resistance against molds and transparency and which does not accumulate in the natural circumstances after disposal thereof.

CONSTITUTION: A packaging film for food is chiefly made of a lactic polymer. Steam permeability of the packing film for food is 50-300g/m².24hr (40° C, 90% RH) and the thickness is 10-500μm.

LEGAL STATUS

[Date of request for examination] 18.04.2000

[Date of sending the examiner's decision of rejection] 30.11.2000

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3178692

[Date of registration] 13.04.2001

[Number of appeal against examiner's decision of rejection] 2000-19693

[Date of requesting appeal against examiner's decision of rejection] 13.12.2000
